

Trevor and Kelly

*Thank you for taking the time to read
our family story.
We value and appreciate your choice and hope our story
will help in making the right choice for you.
Know that however you choose, we wish you and your child all the best.*

Trevor and Kelly met later in life through work. Kelly is a registered professional forester working with the Provincial Government. Kelly's job is both in the office and field and provides excellent benefits and flexibility.

Trevor is a tenures manager with a private company that specializes in First Nation business ventures and tenure management.

Trevor has two girls from his previous marriage.

Brynn (2006) and Carys (2010).

The girls are with Trevor and Kelly periodically through the week and on weekends. Carys (on left) is an animal lover and loves science and growing things. Brynn (on right) is a daredevil at heart and loves exploring and sports. She is also an avid reader and loves writing stories. Both girls are very excited about becoming big sisters and can't wait to welcome their brother or sister with open arms.

Our family also includes two female dogs. Shiva (2008) and Marley (2010).

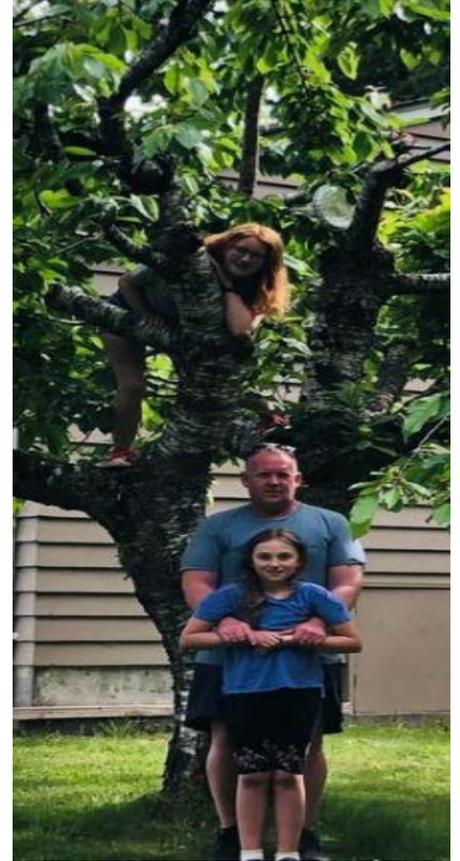

We love walking, feeding and caring for them. They are part of our family and we are always amused by their personalities.

Trevor and Kelly

We have tried both naturally and through medical intervention to have a baby of our own without success. This has been especially hard on Kelly. We both wish to have the opportunity to be parents of our own. Having met later in life, we have come to value, and support each other through the rough times. Our sincere wish is for Kelly to be able to be a full-time mom and we believe we will make an outstanding team as parents.

Trevor is a wonderful dad to Brynn and Carys. Trevor understands the commitment in raising children and is all in. The girls are able to talk to him about anything and he never judges or criticizes them. He parents from a place of compassion, understanding and empathy.

We live on the northern end of Vancouver Island and have 2 acres of property set with vegetable gardens, fruit trees, a soccer pitch and tree house.

Our neighborhood has children of all ages and trails within walking distance.
